DETAILED ACTION

Specification

The specification is objected to because applicant cites the temperature in degree C on pages 3, 4 and 6 of the specification and in degree F on page 8 of the specification. It is suggested that applicant be consistent in the use of temperature units.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In lines 3 and 4 of claim 1, it is recited that the valve body is "constructed to obtain an operation temperature of said timing regulator from -40°C to 55°C for incorporating with said outdoor apparatus." The construction of the valve body permitting such use from -40°C to 55°C is not readily known from the specification. It is noted that the timing regulator is recited on page 3 of the specification to have a "rigid and durable structure" allowing the operation of the device within the above stated temperature range. The prior art timing regulators cited in the specification presumably

also have a "rigid and durable structure," but are stated on page 2 of the specification to operate in the temperature range of -20°C to 50°C. Applicant must show clear support for this claim limitation within the specification or else delete it from the claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
